

---

# OUR PAST ACTIVITIES

- The project titled '**Hybrid Car**' was designed with light weight metals and a 800cc engine, this was displayed in the site of SAE also.
- Projects on '**Alternate fuels**' like Engine running on Ethanol was implemented and this could catch up good publicity in the media last year.
- **Solar powered** three wheeler was also one of the good project last year.
- **Six- stroke engine** was fabricated, and was appreciated by the Dr.V.Ganesan. (IIT-Madras)

---

# Our Present Activities

Projects on Automobile engineering

- Fibre Reinforced Plastic Chassis
- Eliminating Cam system in engines
- Switch type gear transmission

are some of the present projects going on.

---

# Our Future Activities

- Projects in **stratified engines** are been planned to get implemented for the following semesters.
- Projects on **Bio-Diesel** has been planned to be implemented in the upcoming semester.
